

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

1880.

Jan. 26, F. K. Hodgman,	85	
	<u>51 00</u>	
Balance on hand,		<u>\$14 69</u>

The Engineers, in submitting their annual report, would state that the fire engines belonging to the town are all in good working order. The full complement of men to each company having been maintained during the year.

There have been but two fires during the year, to which the department has responded promptly. With the 550 feet of

new hose purchased this year, it is believed the department is supplied with everything necessary for the proper equipment of the fire engines. We would recommend an appropriation of \$1,600 00 for expenses of Fire Department for year ending April 30th, 1880.

For pay of Firemen, 120 men at \$12.00 each,	\$1,440 00
For incidental expenses,	160 00
	<hr/>
	\$1,600 00

Respectfully submitted.

SCHOOL REPORT.

To the Citizens of the Town of Millbury :

In presenting our annual report we invite your careful consideration to its various suggestions, some of them novel, but we believe important. In our expenditures we have sought to be economical but not parsimonious. We have kept within our appropriations, and believe we have left no unpaid bills, as has frequently been the case heretofore.

The only funds strictly intrusted to us are the appropriations for schools, fuel, care of rooms, &c., and the appropriation for repairs, which, with a special appropriation for ventilators this year, amounted to \$7739 64.

The \$412 24 for supplies and incidentals, including pay of truant officer in part, cannot come from either of the above appropriations, and have been paid really by the Selectmen rather than the School Committee, and should not properly appear in our accounts.

FINANCIAL EXHIBIT.

Amounts at the disposal of the School Committee are as follows :—

Town appropriation for support of schools,	\$7500 00
From State Fund,	239 64
Town appropriation for repairs and ventilation,	550 00
Received from Selectmen for unpaid bills of 1878-79,	132 07
Received from Selectmen for supplies, and truant officer in part,	423 19
	<hr/>
	\$8844 90

*Joseph Jackson, Jr., Principal of High School, received a salary of \$1300. The Assistant received \$10.50 per week.

SCHOOL BUILDINGS AND ACCOMMODATIONS.

The school buildings are in good repair, and fairly accommodate our schools. Their sanitary condition has been improved during the year by the introduction of ventilators, which, with intelligent use, obviate the necessity of resorting to the dangerous expedient of opening windows in cold weather.

Our sub-primary schools, especially in Bramanville and the Union District, and the ungraded Park Hill School, are very much overcrowded, and need relief in some way. From seventy to eighty pupils occupy each of these rooms, while they have sittings for but sixty. It is the opinion of the most eminent educators that no teacher of children can do profitable work with more than thirty pupils, while some of ours are obliged to care for more than twice that number.

One means of relief is the enlargement of school accommodations by increase of school-rooms. This involves the necessity of alteration of present buildings or construction of new ones—as, also, the employment of more teachers. We believe, however, there is a better plan; one which will better promote *all the interests* of the children, and have the incidental and secondary advantage of being more economical.

This better plan is the expedient of half-time schools in these grades. It can hardly be doubted that pupils of the age of those in our sub-primary schools would be better off from sanitary considerations, and quite as well off educationally, should they attend school but three hours per day. Were this conceded our sub-primary schools might be divided into two equal sections—one-half to attend the forenoon, and the other the afternoon session. This would relieve the overcrowded rooms, and give the teacher much less difficulty in attending to the wants of the pupils. Evidence is not wanting of the great advantages of such a plan, both regarding the effect on health and the effect educationally considered.

The report of the State Board of Health for 1874 contained a very complete paper upon the effect of school work upon health. Regarding the question of hours of daily attendance upon school by young children its conclusions were in favor of short sessions.

A few extracts from correspondents of the Board, which appear in the report, are here given.

One writer says: "Children under six years old ought not to attend school unless for pure object teaching, or the work of the kindergarten, so called. Children under nine years ought not to have more than three hours of school duty in any form."

Another writes: "I am firmly convinced that seven, in place of five, should be the minimum school age, and that up to nine years children ought not to spend more than three, or, at most, four, hours per day in school."

Another says: "The evidence of improvement in half-time over whole time is in the general vigor of the pupils, promptness in recitation and diminished mortality during the summer vacation from *diseases* of the *brain*."

Still another, who evidently has older pupils in mind, says: "No good study is done after the third hour; the last two hours are spent generally in listlessness or painful attempt to goad the brain on to work."

The report of the State Board of Education for 1877-78 contains a paper upon School Hygiene, by one who has made the subject a special study, in which appears the following statement: "Below the age of 12 years, four hours (daily attendance) are probably sufficient; below 10 years, 3 or $3\frac{1}{2}$; below 7 years, $2\frac{1}{2}$ or 3." "In regard to children 10 years of age," says the same writer, "My opinion is strongly in favor of this restriction."

"The arrangement by which these young pupils are kept in school the same number of hours as those of the age of 17 is absurd from every point of view except one. That one is, however, the one taken by a majority of parents, who consider that they pay to have their children *taken out of their way* for a given number of hours, and are annoyed by their presence at home."

With reference to the success of short school hours educationally, the half-time schools of England furnish extensive and unequivocal testimony.

We quote again from the report of the State Board of Health for 1874: "The half-time system has been in operation (in Eng-

land) for about thirty years, and full reports of its working made by competent and faithful inspectors, are to be found in parliamentary documents. It was devised for the protection of the state, and of the factory children, against the danger of their growing up in ignorance of the elements of education, and is an immense boon to them. But a most unexpected result of it has been to prove that these 'half-time' scholars learn quite as much as the children who are in the same schools twice as many hours a day." Some two years ago, Mr. W. G. Nowell, superintendent of schools in Weymouth, reduced the hours of the lower primary grade from six hours to four and a half; six months later he reduced it still further to three hours per day, and then reduced the middle primary to four and a half hours per day. After a year's trial he reported the following results :

1. "General satisfaction on the part of parents, children and teachers."

2. "Much more constant attendance."

3. "The work is better done; the children's attention is more easily held; their minds and bodies are not wearied; they are eager to do their best for the two hours or more of varied work given them. The out-door life of the afternoon—a boon which is their natural right—makes them vigorous for the mental exertion of the next morning."

4. "In our schools of more than one grade, the teacher, freed from the care of the youngest all of the afternoon, and of the next grade for half the afternoon, can work more effectively with the others."

Wishing to learn if further experience with the plan confirmed the above judgment, a letter was recently addressed Mr. Nowell for that purpose, to which Mr. N. replies, under date of Dec. 6, 1879 :

"I am glad to answer that my primary schools on half-time did better work than on full time." "The best educational results are obtained on half-time, and the physical condition of the pupils improved." "Weymouth," he adds, "will never go back to full time."

All this evidence is here adduced, partly to justify a practice already allowed in our schools, of which parents have sometimes complained—the early dismissal of the youngest pupils—but more especially to show that our over-crowded sub-primaries may be relieved not only without detriment, but even with positive advantage, by adopting the half-time plan—one-half the school attending in the forenoon and the remainder in the afternoon—thus obviating the necessity of more rooms and more teachers.

Before leaving the subject of school-rooms, it may be best here to remark that the committee desire, now that the new Town Hall is completed, that the old hall shall be turned over to the school committee, to be used at their discretion for school purposes.

Any uses at present contemplated will not involve the expenditure of money, but the room may sometime require changing and furnishing to enlarge our school accommodations.

The only appropriations we recommend with reference to school-buildings is the customary one of \$300 for repairs.

TEACHERS.

Frequent changes in the corps of teachers is one of the misfortunes to which schools in all but the larger towns and cities are very subject, and several such have occurred in our schools since our last report, though less than has usually been the case in recent years.

The assistant's place in the High School has been filled by two different teachers. The Intermediate and Sub-Primary Schools in the Providence Street District have each had two incumbents during the year, neither of them being the teachers occupying the same places last year. Both the schools at West Millbury and the school at the Old Common had a change of teachers at the beginning of the year. The table of "statistics of attendance" shows who the teachers have been and are.

PAY OF TEACHERS.

It will be seen by examining the tabular statement that some changes have been made in the pay of teachers, a slight reduction being made in a few instances, equalizing the pay of the same grades among the older teachers.

The salary of the Principal of the High School was also reduced \$100. It was not felt that anything further could be done in this direction with justice to the schools and the teachers. With the return of better times and the upward tendency of wages and cost of living, it is hoped the committee may be able to pay the teachers during the coming year as well, at least, as during the year past.

The enumeration of school children to be returned as a basis for our apportionment of the State fund for next year is less than a year ago, so that our receipts from that source will be a little diminished.

The appropriation for schools for the coming year should be at least \$7500.

ATTENDANCE.

The attendance during the year is shown elsewhere in tabular form, and has been rather better than usual. For the first time the services of a truant officer (Mr. R. K. Merriam) have yielded evident good results.

The inspection of the mills has been more complete than ever before, though only what the law prescribes, and few, if any, children have been employed without the certificate required by law.

In this connection we call attention to still further restrictions imposed by law upon the employment of children on and after May 1st, next.

Section 4 of Chapter 257 of the laws enacted by the Legislature of 1878, reads as follows:—

“On and after the first day of May, eighteen hundred and eighty, no child under fourteen years of age shall be employed in any manufacturing, mechanical or mercantile establishment

while the public schools in the city or town where such child lives are in session, unless such child can read and write. Every owner, superintendent or overseer in any establishment above named, who employs, or permits to be employed, any child in violation of this section, and every parent or guardian who permits such employment, shall for every such offense forfeit a sum of not less than twenty nor more than fifty dollars for the use of the public schools of such city or town."

The question of truancy is a difficult one to deal with. The town has made all the provisions required by law, but they are practically inoperative, and from the nature of the case must be so. At one of the recent meetings of the Worcester County (South) Association of School Committees steps were taken looking to the establishment of a Truant school for Worcester county, in accordance with which an article appears in the warrant for the March Town Meeting, for which we ask your favorable consideration. It is believed the expedient will, in the most efficient manner, cure the evil, and rescue the evil-disposed boys from the ill consequences of ignorance and vagrancy.

HIGH SCHOOL.

The High School has had a prosperous and profitable year. Some unavoidable changes in the incumbency of the assistant's position have occurred, but we have been very fortunate in both the ladies who have filled the place. There has been apparent in the pupils more than usual interest and enthusiasm in their work. The regular annual examination was quite satisfactory. The graduating class has dwindled to a single representative, Master Clifford W. Randall. We cordially commend his perseverance, through which alone we can say we have a graduating class. It is hoped and believed the other classes will in fair numbers complete the course. We regret that a higher estimate is not placed upon the worth of such a course of study as our High School offers.

Surely such attainments as can be acquired in our Grammar Schools are a pitiful preparation for the duties of life—and the few dollars which tempt our boys and girls into some mechanical or mercantile pursuit are a poor recompense for dwarfed in-

tellects. The lower schools aim to furnish so much as is absolutely indispensable for every one in even the lowest calling or occupation, but no consideration of a few dollars is worthy of thought, except to those in real poverty, as an inducement to forego the advantages of an introduction, at least, to culture, and of some training in thinking upon such topics as engage the attention of intelligent men and women. The social movements which now most seriously threaten society, are the offspring of untrained thought upon social questions which demand high intelligence and educated thought for their proper solution.

The course of study has received careful thought, and embraces no more than is contemplated in the statutes of our Commonwealth, though it may perhaps be well questioned if more attention bestowed upon a somewhat narrower range of studies might not be of more real profit. Your committee endeavor to carefully consider all such questions and seek at all times to promote the best interests of our youth. The course provides for a choice between Classical and English studies. We think it proper here to declare it our belief that with a majority of the scholars who attend our High School, who anticipate no further schooling, their time may be most profitably spent in pursuing the studies of the English course. Pupils, however, who expect to enter the higher academies, or those who have special tastes and aptitude for such studies, will do well to select the Classical course, since their later study may be reasonably expected to supplement the studies of the High School in a way to make them profitable. Parents should carefully consider the choice of their children as between the English and Classical course, or refer it to competent advisers; unless they can finish the Classical course, and acquire all of the Latin which the course requires, they better not begin it, for less than that is too little to be of much value, and their time may be more profitably employed otherwise. The request is occasionally made that pupils who have already partially pursued the Classical course be allowed to discontinue it. In some instances permission is readily granted because it is felt that a mistake was made in the first choice of a study not adapted to the pupil's wants; at other times

what we believe to be the best interest of the scholar forbids us to consent.

The matter should be carefully considered in the first place and the course selected should be steadily pursued, else waste of time in misdirected effort is the sure result. The Classical course should be followed sufficiently to repay the study expended, which requires at least so much as is included in our course, or it should not be selected.

EVENING SCHOOLS.

Your Committee desire to make public recognition of a very remarkable and we believe a very valuable service rendered voluntarily and without expectation of reward, by two of our teachers.

During the Fall term, Miss Ellen L. Hills sought the consent of the Committee to open an evening school in the Providence Street Grammar School-room, which was readily granted. Miss Hills, assisted by Miss Fannie W. Morey, then opened and continued through the term an evening school, attended by some forty pupils, mostly young men and women who worked during the day in some of the mills, some of them coming from considerable distances. During the Winter term Miss Hills continued the school alone, it being somewhat smaller, and Miss Morey finding the work, added to her ordinary school work, more than she could safely do.

The Committee felt it a duty to offer some compensation for this service; this, however, was refused by the teachers, who had wrought in a purely philanthropic spirit. A token of our appreciation of their services was however presented in other than pecuniary form.

This school has shown that there is a demand for evening schools. In such a community as ours, there are many who cannot attend day schools, who, it is believed, would gladly avail themselves of evening schools. We recommend an appropriation sufficient to sustain two such schools during two terms of the year. Two hundred dollars would probably be sufficient.

DEFECTS OF OUR SCHOOL SYSTEM.

While your Committee report from year to year that the schools are in good condition, we confess that this is a relative rather than an absolute statement; when compared with schools in general, it is true. Our teachers work earnestly and conscientiously; they endeavor to secure the interest of the pupils; their schools are, for the most part, orderly, and seem industrious. The schools are in fact as good as the average of public schools in any of our country towns.

But when we have said all this we are all the time painfully aware of terrible defects, especially observable in schools of Grammar grade and below, not wholly remedied in the higher schools, and, indeed, proving one of the greatest obstacles in the work of the higher schools.

Though our boys and girls are taught Reading, but very few, after they have gone through our schools, are intelligible and intelligent readers; though they are instructed in Spelling, and in Grammar, which professes to teach how to speak and write correctly, very few can write a page, or converse for a few moments without making many blunders; though they spend a large fraction of their time for from six to twelve years upon the "science of numbers and the art of computing by them," they often find themselves at loss in the most simple computations of practical business. The very imperfect knowledge of the history of our country and science of civil government observed in community (questions concerning which, the common people are to help decide by their votes) proclaims the failure of the schools in this field. How meagre, how well nigh nothing is the introduction to the great and noble literature of our language in our schools! The ease with which mountebanks of all descriptions impose upon the credulity of people, shows how little the schools have done to impress the plainest and simplest of scientific lessons, *The Uniformity of Natural Law*.

In our present system one of the most important duties of the public school is lost sight of.

We will quote from one who has had ample field for observation of the methods of and results obtained in the average

public school. In an address to a company of teachers, Mr. Charles F. Adams, Jr., says: "Did it ever after all occur to you, what is the great end and object of this common school system?"

"Why do we get all these children together, and labor over them so assiduously year after year?"

"Now, it may well be that it never suggested itself in that way to you, but I think it may safely be asserted that the best possible result of a common school education,—its great end and aim,—should be to prepare the children of the community for the far greater work of educating themselves.

"Now in education, as in almost everything else, there is a strong tendency among those engaged in its routine work to mistake the means for the end. I am always struck with this in going into the average public school. *Arithmetic, grammar, spelling, geography and history are taught, as if to be able to answer the questions in the text-books were the great end of education.

"It is instruction through a perpetual system of conundrums. The child is made to learn some queer definition in words, or some disagreeable puzzle in figures, as if it were in itself an acquisition of value,—something to be kept and hoarded like silver dollars, as being a handy thing to have in the house. The result is that the scholars acquire with immense difficulty something which they forget with equal ease; and when they leave our grammar schools they have what people are pleased to call the rudiments of education, and yet not one in twenty of them can sit down and write an ordinary letter in a legible hand, with ideas clearly expressed, and in words correctly spelled; and the proportion of those who leave school with either the ability or desire to further educate themselves is scarcely greater.

"Going a step further and following the scholars out into grown-up life, I fancy that a comparison of experiences would show that scarcely one out of twenty of those who leave our

* A slight liberty has been taken with Mr. Adams's language, only, however, adapting it to the changed circumstances in which it is used.

schools ever further educate themselves in any great degree, outside, of course, of any special trade or calling through which they earn a living. The reason of this, I would now suggest, is obvious enough; and it is not the fault of the scholar.

“It is the fault of a system which brings a community up in the idea that a poor knowledge of the rudiments of reading, writing and arithmetic constitutes in itself an education.”

This is a terrible indictment of the scholars, but candor compels us to say it is true.

The blame for all this is in the system of instruction handed down from generations long dead, and until some mighty voice shall say

“Let the dead past bury its dead,”

we shall have nothing better.

Things must be taught, not *books*; *ideas* must be taught, not *words*. Books and words are now well nigh impassable barriers between the minds and hearts of teachers and their pupils.

Some reconstruction must overthrow these barriers; and the teacher's mind and heart must, through his or her personality, come into actual contact with the mental and moral life of the child.

Your committee have endeavored by revision of the course of study, and suggestions to teachers placed in their hands for their guidance, as well as by occasional suggestions made orally when visiting the schools, to correct these things, and we believe with some measure of success, though far less than we desire, and it is quite probable that such fundamental changes in the modes of educating, that is, of training children as are needed, would not meet with popular favor, for comparatively few recognize the defects, or, recognizing them, trace them to their true cause.

A reform such as is here suggested requires to be made with a firm hand and steadfast purpose, and demands the work of an earnest and well trained educator as a constant supervisor, whose powers should be well nigh, but not quite, autocratic; and your school authorities, whether a superintendent or committee, should be sustained in it, and should be retained in

service with such permanence as to secure the best results of their efforts. This leads to some discussion of

SCHOOL SUPERINTENDENCE. •

That an interest of so supreme importance as that of the education of the young, the training of those upon whom depend the future wisdom and stability of the social, political, moral and religious institutions of the world, demands thorough, constant, and intelligent supervision, requires no proof.

The thorough, systematic and intelligent supervision of most important business interests is never left to accident. In all great manufacturing establishments, skilled superintendents are sought. It would also in such cases, be universally conceded that the services of one competent man thoroughly acquainted with the details of the business, who should give it his whole time and attention, would be worth infinitely more than a dozen men without special experience or training, and whose time and attention must be partly and even largely occupied with other things. But in the matter of school supervision, the course usually pursued is analogous to the choice of the dozen unqualified, instead of the one specially qualified and skillful superintendent.

Your Committee endeavor to do the best they can for your schools, but they are painfully aware that they cannot give the time and attention the magnitude of the interest requires; they believe, too, the services of a trained educator would be worth much more,—would, indeed, be worth a liberal compensation, such as would secure and retain a first class man.

If the town be not ready yet for this, and, with the present condition of our town finances we do not look for its favorable consideration at present, we yet hope the public sentiment may grow to it before long. One of the disadvantages of our present system is that with six members of a committee it is more difficult, indeed, well nigh impossible, to secure uniformity of superintendence and really systematic work in the schools. It is believed that this disadvantage would be somewhat lessened by a reduction of the committee to three, instead of six as we

now have. The law provides for such a reduction. It is believed the work of supervision could be better performed by three than at present.

RELATION OF THE PUBLIC LIBRARY TO SCHOOLS.

We think it proper to incorporate in our report some considerations concerning our Town Library as an educational agency supplementary to our schools.

We make the suggestions, not in any spirit of fault-finding with the management of the library, but because we believe the trustees of the library have never thought of the matter in the light in which it has occurred to us, and that when their attention and that of the public is drawn to it, its propriety will be readily seen and the suggestions adopted.

We believe the library can and should have some vital connection with the schools. Upon this point the testimony of so competent a witness as Mr. S. S. Green, the accomplished Librarian of the Worcester Public Library, is worthy of reproduction here. In a paper prepared for the American Library Association, Mr. G. says :—

“The power of teachers is practically unlimited, to awaken interests in the young that will lead them to read and study good books throughout their lives.”

“Why should not all the public schools, those for the younger as well as the older scholars, become depositories of books belonging to towns and cities, and every head of a school become an assistant librarian, sending to the libraries for a limited number of such books as are desired, and changing them so often as should be thought desirable.”

“The librarian and teacher, acting in concert, could do an immense work in procuring the perusal of good books and in keeping the young from poor or hurtful literature.”

Following more in detail the same line of thought, Mr. C. F. Adams, Jr., in the paper from which we have already somewhat freely quoted, says :—

“Having started the child by means of what we call a common school course, having, as it were, taught it to walk,—the

process of further self education is to begin. The great means of self education is through books—through much reading of books. But just here there is in our system of instruction a missing link. In our schools we teach children to read ;—we do not teach them *how* to read. That, the one all important thing,—the great connecting link between school education and self education,—between means and end,—that one link we make no effort to supply. As long as we do not make an effort to supply it, our school system in its result is and will remain miserably deficient.” * * * * *

“ Though the school and the library stand side by side, there is, so to speak, no bridge leading from the one to the other : as far as I can judge we teach our children the mechanical part of reading, and then we turn them loose to take their chances.

“ If the child has naturally an inquiring or imaginative mind, it perchance may work its way unaided through the traps and pitfalls of literature ; but the chances seem to me to be terribly against it. It is so very easy, and so very pleasant too, to read only books which lead to nothing, light and interesting and exciting books, and the more exciting the better, that it is almost as difficult to wean ourselves from it as from the habit of chewing tobacco to excess, or of smoking the whole time, or of depending upon stimulus, on tea or coffee or spirits.

“ Yet here,—on the threshold of this vast field, you might even call it this wilderness of general literature, full as it is of holes and bogs and pitfalls, all covered over with poisonous plants,—here it is that our common school system brings our children, and having brought them there, it leaves them to go on or not, just as they please ; or, if they do go on, they are to find their own way or lose it, as it may chance.”

“ I think this is all wrong. Our educational system stops just where its assistance might be made invaluable,—just where it passes out of the mechanical and touches the individual,—just where instruction ceases to be drudgery and becomes a source of pleasure.” * * * * *

“ This dealing with the individual and not with the class, is therefore, the one great pleasure of the true school teacher’s

life. It can only be done in one way,—you have to furnish the individual mind the nutriment it wants, and, at the same time, gently direct it in the way it should go. In other words, if the teacher is going to give himself the intense enjoyment and pleasure of doing this work, he cannot stop at the border of that wilderness of literature of which I was just now speaking, but he has got to take the pupil by the hand and enter into it with him; he must be more than his pedagogue, he must be his guide, philosopher and friend. And so the teacher, with the scholar's hand in his, comes at last to the doors of the Public Library."

When those doors are open and proper facilities provided for the teacher and pupil to enter together, and work together, through some such expedients as those hinted at below, or such others as experiment might prove better, then indeed, in the further language of Mr. Adams—

"Both schools and library would begin to do their full work together, and the last would become what it ought to be, the natural complement of the first,—the People's College."

The plan of the organization of our library theoretically contemplates a connection between it and the schools. It was originally intended that the chairman of the school committee and the principal of the High School should be *ex-officio* members of the board of trustees of the library, though they have not practically held any such relation. Now that the library is occupying new and more commodious apartments, it is a favorable time for bringing about so desirable an extension of its benefits. If the wants of the schools can be consulted in the purchase of such works as will help illustrate and elucidate the studies of the schools, and such juvenile literature, now so abundant, as shall introduce our school children to wholesome reading under the guidance of librarian and teachers; and if some special facilities can be afforded our teachers for access to the library; and, further, if what might be termed educational catalogues can be published for the guidance of both teachers and pupils, it is believed that the library might be of incalculably greater service than it now is.

We have, perhaps, somewhat transcended our sphere in making these suggestions, and we trust we shall not incur the charge of meddlesome interference. Our interest in all that pertains to the educational interests of the town is our only, and, we hope, sufficient apology.

Should these suggestions find favor with the trustees of the library we will venture to hope that our teachers, both in their schools and in enlarged library advantages, and our librarian as well, may verify Mr. Green's statement in another paper, entitled "Personal Relations Between Librarians and Readers," where he says "There are few pleasures comparable to that of associating continually with curious and vigorous young minds, and of aiding them in realizing their ideals."

In closing our report we wish to say that the somewhat severe criticism of our common schools has been made, not to diminish public confidence in the schools, but rather to indicate the direction of our efforts for their improvement;—the ideal we seek;—and to enlist public sympathy and co-operation in these efforts. Sympathy and co-operation assuming the practical form of liberal appropriations and generous confidence will strengthen us for the earnest endeavor to promote, so far as possible, all desired reforms.

The examinations at the close of the year satisfy us that our past efforts have not been wholly fruitless; since in our examination of more than usual severity, the results were on the whole more satisfactory than in past years, though some schools stood the test much better than others.

We regard such an examination as was recently passed, quite as much a criterion of the teacher's as of the scholar's work, and propose hereafter to consider it in the question of the re-election of teachers.

At a meeting of the School Committee, holden Tuesday evening; March 2d, the following resolutions were presented and unanimously adopted :—

Whereas, the School Committee of the Town of Millbury have learned of the death of Mr. T. R. HARRINGTON, for many years a member of this Board. Therefore,

Resolved, That this Committee have witnessed with pain his gradual failure in health, and have learned with real sorrow of his death.

Resolved, That the town has lost a good citizen, and the schools an old and steadfast friend, who for many years, as a member of the School Committee, and colleague with most of the present committee, was ever found a kind and courteous associate.

Resolved, That we hereby extend our hearty sympathy to his family in this hour of deep bereavement.

Resolved, That these resolutions be entered upon our records, and that a copy of them be forwarded to the family of the deceased."

MILLBURY, *March* 8, 1880.

REPORT OF TRUSTEES OF TOWN LIBRARY.

FINANCES.

The Trustees charge themselves with the following amounts, viz. :—

March 1, 1879.	Cash in hands of Librarian,	\$24 08
" "	Cash in Millbury Nat. Bank,	457 26
Jan. 21, 1880.	Town grant,	200 00
" "	Dog tax refunded,	293 77
March 1, 1880.	Amount from fines and catalogues,	25 48
Total.		<u>\$1,000 59</u>

They have expended as follows, viz. :—

Librarian's salary to January 1, 1880,	\$100 00
Rent to January 1, 1880,	100 00
Sanford & Co., for books,	205 80
C. D. Morse & Co., book cases,	240 00
Strauss Brothers, frescoing,	25 00
F. E. Powers, coal,	9 25
Justus Eddy, coal,	6 25
Subscription books,	21 65
Incidentals,	11 69
Total expenses,	<u>\$719 64</u>

Balance on hand March 1, 1880 :

In hands of Librarian,	\$20 20	
In Millbury National Bank,	260 75	280 95
		<u>\$1,000 59</u>

The balance on hand is subject to outstanding bills for salary and rent coming due April 1, 1880, and to an unsettled account for books. The expenditure for books has been mainly for such as were upon the catalogue, but which had been lost or worn out; so that our library now contains, in good condition, nearly all whose titles appear upon the catalogue.

STATISTICS.

Number of volumes taken during the year,	9,244
Number of persons taking,	602
Number of volumes not returned,	3

The Librarian reports that "the number of volumes taken is less than that of the preceding year, but there has been a marked increase

in the use of the library for purposes of study and information upon special topics."

During the coming season we hope to remove into larger and more commodious quarters in the new Town House. The trustees have, as contemplated a year ago, caused shelving of an estimated capacity of four thousand volumes to be placed in the library room in anticipation of this removal.

There is still needed a counter for the room, and some means of warming it. To meet these and the ordinary expenses, together with that of a new catalogue hereinafter mentioned, your trustees ask for an appropriation of two hundred dollars and the dog fund.

Heretofore, owing to the small size of the library and lack of room there has been no attempt at classification of the books, but they have been put upon the shelves in the order of the purchase. But as the library increases in size the inconvenience of this arrangement, or rather lack of any arrangement, becomes more and more apparent.

In view of the fact that in moving we shall have facilities for so doing, it seems to your trustees desirable at that time to have the books arranged upon some system. If this should be done it would of necessity call for an entirely new catalogue; now it must be obvious to every one that it would be greatly to the advantage of the library if at the same time there could be a generous addition of new books.

This has so impressed us that we have thought that the town might be willing to make a special appropriation of one thousand dollars, to be wholly expended for books—this to be in place of all appropriations, saving the "dog fund," for the next three years.

If the town in its wisdom should see fit to adopt this suggestion, it will only be granting in advance an ordinary, and not making an additional, appropriation.

The attention of your trustees has been called to the lack of a reading room, which in a town of our size is noticeable and one that ought speedily to be met. They would therefore recommend that the town put at their disposal the room in the Town House known as the Reading-room, and cause it to be lighted and warmed, if the citizens of the town will in a private capacity provide a suitable selection of Daily and Weekly Newspapers and Magazines.

JOHN HOPKINS,	} Trustees of Library.

WARRANT.

WORCESTER, SS.

*To either of the Constables of the Town of Millbury,
in the County of Worcester,*

GREETING.

In the name of the Commonwealth of Massachusetts, you are directed to notify and warn the Inhabitants of the Town of Millbury, qualified to vote in elections and town affairs, to meet at the new Town Hall in said Millbury, on Monday, the twenty-second day of March instant, at nine o'clock in the forenoon, to act on the following articles, to wit:—

- Article 1.* To choose a Moderator to preside in said meeting.
- Art. 2.* To choose all necessary Town Officers for the year ensuing.
- Art. 3.* To hear the reports of the several Town Officers and Committees, and act thereon.
- Art. 4.* To raise such sums of money as may be necessary to defray town charges and payment of debt for the year ensuing, and make appropriations of the same.
- Art. 5.* To determine the time when all taxes shall be payable, and make regulations concerning the payment of the same.
- Art. 6.* To raise and appropriate money for the care and improvement of the Town Library.
- Art. 7.* To raise and appropriate money for the care and improvement of the Cemeteries.
- Art. 8.* To see if the town will accept the list of names prepared by the Selectmen to be placed in the jury box, or take action relating to the same.
- Art. 9.* To see what compensation the town will allow members of the Fire Department for their services.

- Art. 10.* To see if the town will authorize its Collector to use all means of collecting taxes, which a town treasurer, when appointed collector, may use.
- Art. 11.* To see if the town will authorize its treasurer to borrow money for the use of the town.
- Art. 12.* To choose any committee or committees that may be thought necessary.
- Art. 13.* To appropriate money to defray the expenses of a suitable observance of Memorial Day.
- Art. 14.* To determine the manner of repairing the highways, town-ways and bridges the year ensuing.
- Art. 15.* To see if the town will appropriate any money for the lighting of the streets.
- Art. 16.* To see if the town will appropriate any money to take care of the clocks on the meeting-houses in town.
- Art. 17.* To see in what manner the town will direct their town meetings to be warned.
- Art. 18.* To see if the town will compensate Hervey Park for conveying children in Hayward district to school.
- Art. 19.* To see if the town will appropriate any money to keep the sidewalks in repair.
- Art. 20.* To see if the town will grant the free use of a room in the new Town House for the Band to practise.
- Art. 21.* To see if the town will straighten and rail the road near the mill of M. A. Lapham, and raise and appropriate money therefor.
- Art. 22.* To see if the town will raise and appropriate a sum of money to buy a gravel pit of James Campbell.
- Art. 23.* To see if the town will appropriate any money to straighten the road leading from house of D. T. March to the house of J. L. A. Faneuf.
- Art. 24.* To see if the town will raise and appropriate a sum of money to build a sidewalk from cotton mill of Crane & Waters to Wheeler's village.
- Art. 25.* To see if the town will instruct the Selectmen not to grant any licenses for the sale of alcoholic liquors as a beverage.
- Art. 26.* To see if the town will appropriate a sum of money to be placed at the disposal of the Selectmen, for use in prosecuting persons selling intoxicating liquors illegally.

- Art. 27.* To see if the town will appropriate any money for guide-boards and posts for the same.
- Art. 28.* To see if the town will raise and appropriate any money to build a road past the house of John Hinchliff, in Bramanville.
- Art. 29.* To see if the town will raise and appropriate a sum of money to repair the road to house of Samuel Malhoit, near Single-tary pond.
- Art. 30.* To see if the town will instruct the Selectmen to rent the rooms, in the new Town House, not wanted for town purposes.
- Art. 31.* To see if the town will widen and rail the road near the Burling Mills.
- Art. 32.* To see if the town will request the County Commissioners to establish a Truant School for Worcester County.
- Art. 33.* To see if the town will vote to reduce the school committee from six members to three, as provided by law.
- Art. 34.* To see if the town will turn over the Old Town Hall to the school committee, to be used at their discretion for school purposes.
- Art. 35.* To see if the town will build a sidewalk from Canal street, to near the residence of Dennis McCarthy, and raise and appropriate money therefor.
- Art. 36.* To see if the town will widen the traveled part of the road near the house of Sylvester Stockwell, and raise and appropriate money therefor.
- Art. 37.* To see if the town will appropriate any sum of money to finish the road, from Maple street by the house of Michael Garvey, as laid out and accepted by the town at its meeting in March, 1879.
- Art. 38.* To see if the town will build a sidewalk from Canal street to the mill of Peter Simpson, and raise and appropriate money therefor.
- Art. 39.* To see if the town will repair the highway from the school-house in West Millbury to the house of Richard Murphy, or do anything relative thereto.
- Art. 40.* To see if the town will widen the road from the house of Richard Murphy to the corner west of the house of E. H. Chamberlain, or do anything relative thereto.
- Art. 41.* To see if the town will establish a Fair for the sale of all kinds of live stock, or take any action relating thereto.
